The Internal Deployment Use (Attachment C) and the Contribution Agreement (Attachment D) must be signed by You and Original Contributor in order to become effective. Once effective, these licenses and the associated requirements and responsibilities are cumulative. Capitalized terms used in this License are defined in the Glossary.

b) Other than the licenses expressly granted in this License, Original Contributor retains all right, title, and interest in Original Code and Upgraded Code and Specifications.

2.2. Your Grants.

a) To Other Licensees. You hereby grant to each Licensee a license to Your Error Corrections and Shared Modifications, of the same scope and extent as Original Contributor's licenses under Section 2.1 a) above relative to Research and Development Use, Attachment C relative to Internal Deployment Use, and Attachment D relative to Contribution in kind.

b) To Original Contributor. You hereby grant to Original Contributor a worldwide, royalty-free, non-exclusive, perpetual and irrevocable license, to the extent of Your Intellectual Property Rights covering Your Error Corrections, Shared Modifications and Reformatted Specifications, to use, reproduce, modify, display and distribute Your Error Corrections, Shared Modifications and Reformatted Specifications, in any form, including the right to sublicense such rights through multiple tiers of distribution.

c) Other than the licenses expressly granted in Sections 2.2 a) and b) above, and the restriction set forth in Section 3.1 d) (iv) below, You retain all right, title, and interest in Your Error Corrections, Shared Modifications and Reformatted Specifications.

2.3. Contributor Modifications. You may use, reproduce, modify, display and distribute Contributor Error Corrections, Shared Modifications and Reformatted Specifications, obtained by You under this License, to the same scope and extent as with Original Code, Upgraded Code and Specifications.

2.4. Subcontracting Error Corrections or Shared Modifications. You may deliver the Source Code of Community Code to other Licensees having at least a Research and Development Use license, for the purpose of furnishing development services to You in connection with Your rights granted in this License. All such Licensees must execute appropriate documents with respect to such work consistent with the terms of this License, and acknowledging their work-made-for-hire status or assigning exclusive right to the work product and associated Intellectual Property Rights to You.

3. Requirements and Responsibilities.

3.1. Research and Development Use License. As a condition of exercising the rights granted under Section 2.1 a) above, You agree to comply with the following:

a) Your Contribution to the Community. All Error Corrections and Shared Modifications which You create or contribute to are automatically subject to the licenses granted under Section 2.2 above. You are encouraged to license all of Your other Modifications under Section 2.2 as Shared Modifications, but are not required to do so. You agree to notify Original Contributor of any errors in the Specification.

b) Source Code Availability. You agree to provide all Your Error Corrections to Original Contributor as soon as reasonably practicable and, in any event, prior to Internal Deployment Use or Commercial Use, if applicable. Original Contributor may, at its discretion, post Source Code for Your Error Corrections and Shared Modifications on the Community Web Server. You may also post Error Corrections and Shared Modifications on a web-server of Your choice; provided, that You inform the Original Contributor and that You must take reasonable precautions to ensure that only Licensees have access to such Error Corrections and Shared Modifications. Such precautions shall include, without limitation and at least, a click-on, download certification of Licensee status required of those attempting to download from the server. An example of an acceptable certification is attached as Attachment A-2.

c) Notices. All Error Corrections and Shared Modifications You create or contribute to must include a file documenting the additions and changes You made and the date of such

additions and changes. If it is not possible to put the notice in a particular Source Code file due to its structure, then You must include the notice in a location (such as a relevant directory file), where a recipient would be most likely to look for such a notice.

d) Redistribution.

(i) Community Code. Community Code may be distributed in Source Code or Executable form to anybody that accepts the ZCSL License conditions and becomes a licensee. You may not offer or impose any terms on any Community Code that alter the rights, requirements, or responsibilities of such Licensee.

(ii) Community Code Compatibility. All Community Code must be Compliant Community Code prior to any Redistribution, whether originating from You or acquired from a third party. So if You plan to make any further Shared Modifications to any Community Code previously determined to be Compliant Community Code, you must ensure that it continues to be Compliant Community Code.

(iii) Derivative Work. If You make any non shared Modifications to any Community Code without contributing them as Shared Modifications, You must clearly indicate that your distribution is a modified version of the official Community Code and must clearly remind to your Licensees that they also have to accept the ZCSL License conditions on your Derivative Work.

(iv) Modified Executable. You may distribute Executable version(s) of a Derivative Work to Licensees and other third parties only for the purpose of evaluation and comment in connection with Research and Development Use by You. You must ensure that the Executable distribution based on a Derivative Work carries a different mark than the ZILVERLINE Trademarks. You may distribute a Derivative Work under a license of Your choice, which may contain terms different from this License, provided (a) that You are in compliance with the terms of this License, and (b) You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by Original Contributor or any other Contributor. Any other type of use must be subject to the execution of a complementary license agreement by You and Original Contributor.

(v) Modified Class, Interface and Package Naming. In connection with Research and Development Use by You only, You may use Original Contributor's class, interface and package names only to accurately reference or invoke the Source Code files You modify. Original Contributor grants to You a limited license to the extent necessary for such purposes.

(vi) Copyrights and other Attribution Notices. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from Community Code, excluding those notices that do not pertain to any part of the Derivative Works. You may add Your own copyright statement to Your Modifications.

(vii) You expressly agree that any distribution, in whole or in part, of Modifications developed by You shall only be done pursuant to the terms and conditions of this License.

e) Extensions.

(i) Community Code. You may not include any Source Code of Community Code in any Extensions without the prior consent of the Original Contributor;

(ii) Open. You agree to refrain from enforcing any Intellectual Property Rights You may have covering any interface(s) of Your Extension, which would prevent the implementation of such interface(s) by Original Contributor or any Licensee. This obligation does not prevent You from enforcing any Intellectual Property Right You have that would otherwise be infringed by an implementation of Your Extension.

(iii) Class, Interface and Package Naming. You may not add any packages, or any public or protected classes or interfaces with names that originate or might appear to originate from Original Contributor including, without limitation, package or class names which begin with "com.zilverline", org.zilverline or its equivalents in any subsequent class, interface and/ or package naming convention adopted by Original Contributor. It is specifically suggested that You name any new packages using the "Unique Package Naming Convention" as described in "The Java Language Specification" by James Gosling, Bill Joy, and Guy Steele, ISBN 0-201-63451-1, August 1996. Section 7.7 "Unique Package Names", on page 125 of this specification which states, in part:

"You form a unique package name by first having (or belonging to an organization that has) an Internet domain name, such as "sun.com". You then reverse the name, component by component, to obtain, in this example, "com.sun", and use this as a prefix for Your package names, using a convention developed within Your organization to further administer package names."

3.2. Additional Requirements and Responsibilities. Any additional requirements and responsibilities relating to the Technology are listed in Attachment F (Additional Requirements and Responsibilities), if applicable only, and are hereby incorporated into this Section 3.

4. Versions of the License.
